

Allows manual selection and elimination of poor quality fruit for processing.

## DEVICE APPLICATION

Selection and manual removal of citrus distributed on a surface of moving polished rollers that transport the fruit. The rollers describe a rotary motion as they move and rotate the fruit for complete inspection.

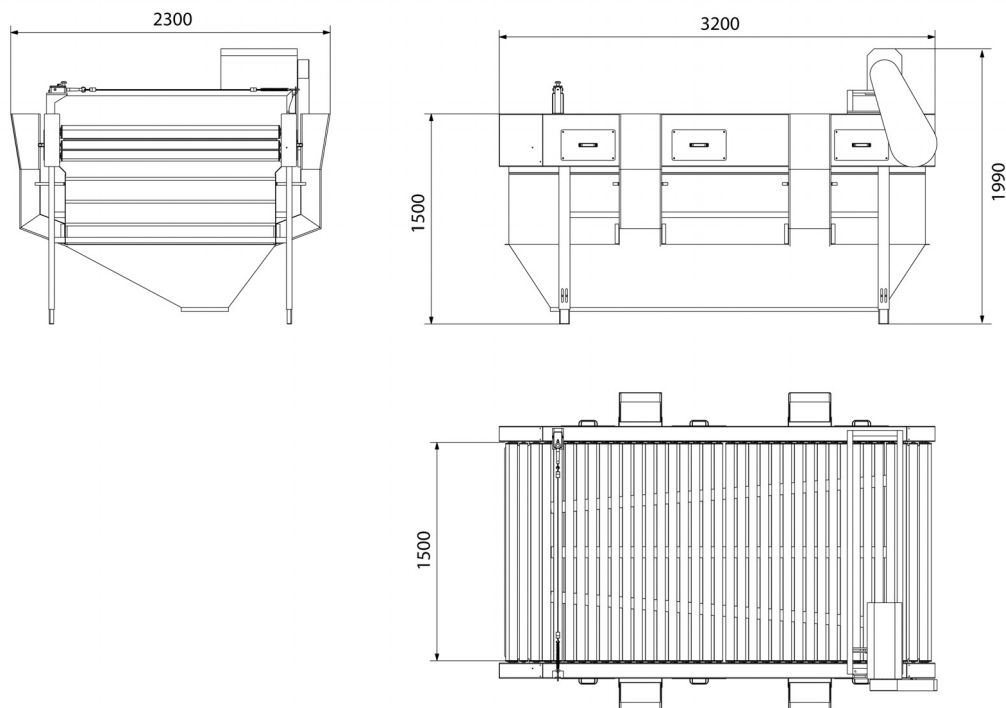

## DEVICE DESIGN

The roller surface is driven by two independent channels at the sides. May have four outputs of waste, 2 on each side, which are connected to a hopper bottom or may be a central area on the surface of rollers for the waste. Supports thermoplastic bearings. Stainless steel bearings and gears. Structure and elements in contact with the product made of stainless steel.

## TECHNICAL INFORMATION

Power motor ————— 4 Kw  
Weight ————— 950 Kg

## DIMENSIONS

## PRODUCTS

Design, construction, installation, starting and maintaining of machines, extraction facilities and juice processing, fully contrasted, reliable and safe, adapted to the needs of customers through constant innovation based on our experience, incorporating new materials and technologies to our products.

## SERVICES

Technical service, application spare parts, technical information, training.
