

# Oil Filled Shock-proof Pressure Gauge

## ■ Product description

It is combined with Pressure guiding system (including joint, spring tube, limiting screws, etc.), gear drive, number device(pointer and dial) and the shell(watchcase,cover and glass,etc.).

The gauge shell is air tight structure,can effectively protect the internal parts from the environmental impact and invasion pollution.

The instrument in the shell is filled with damping liquid (silicone oil or glycerin) which can anti vibration the working environment and reduce the influence of medium pressure plusing.

## ■ PHYSICAL PREPERTIES

Measure Range	0 to -0.1MPa/14.5psi
Diameter	60mm
Fitting	M14*1.5/ 1/4"
Accuracy class	2.5
Material	Iron shell, copper connector&mechanism
Color	Black body, metal joint

## ■ Notes

Should be regularly tested (at least once every three months)

No shelf life limitation.

No skin irritaion problems experienced.
